Scope forward	1.49 - 2.10 m
Dead weight	1035 - 1095 kg
Total length	2454 mm
Width	831 mm
Operating hours	Up to 8 hours
Options	Solid tyres, Load hook option, forklift attachment, Cover hood, LED working light, adaption for curved pads, optional foam pads, winch option available

The new **GW625-2** is perfect for building projects with large window sections which require a large load bearing capacity of up to 625kg.

Thanks to its width of only 83cm, it fits through any opening on the construction site and can still perform vertical assemblies up to **4.2m overhead**.
